

THE CURRA MOORS AGAIN

Thursday 9th September 2021

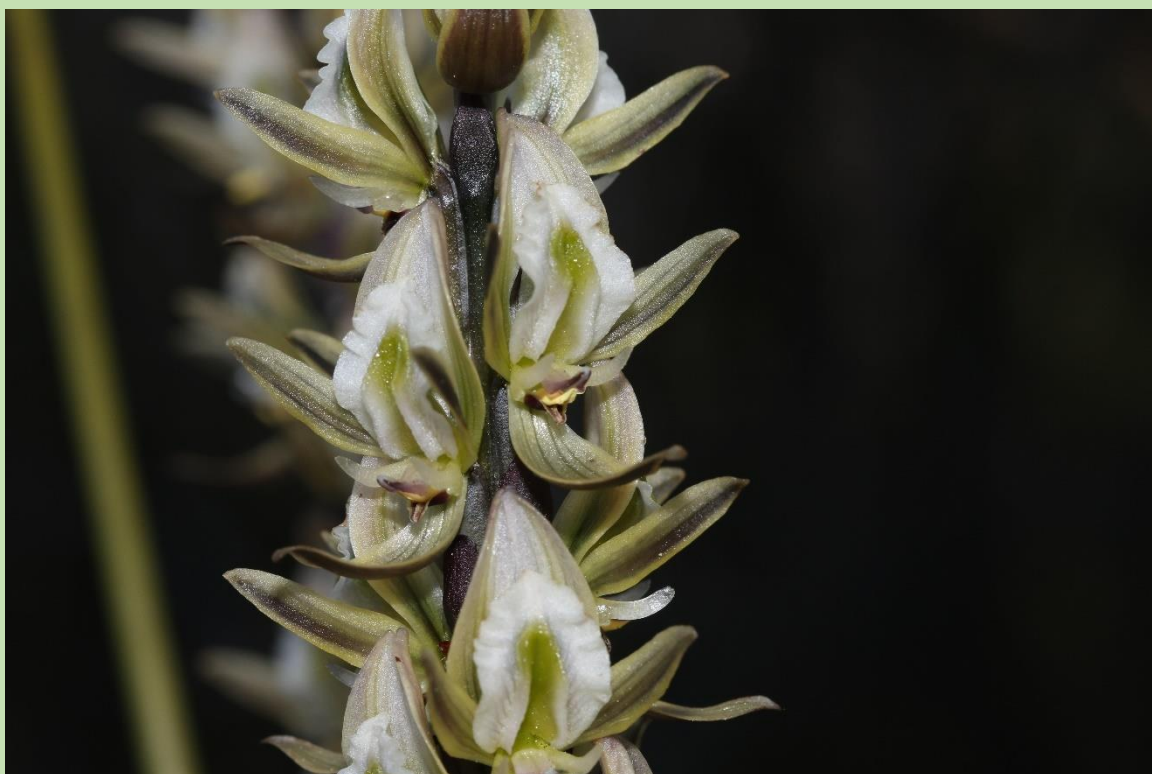

After lunch we escaped once more and reprised the Curra Moors Fire Trail, hoping not just to get another view of the leek orchids but also the full flowering *Styphelia triflora*! We were successful in both!

Prasophyllum elatum – Tall Leek Orchid

Bloodwood seed capsules

Viminaria juncea - Native Broom

Thelymitra ixioides

Telopea speciosissima – at least no-one is coming down here to cut them

Grevillea oleoides

Calytrix tetragona

The Tetratheca have been magnificent this year
