

Wattamolla

July 18th 2022

An NPA Walk

OK, I confess: those shots were taken by me in 2020 along the Coast but we did see whales, even if their behaviour was not quite so spectacular!

We also spied a White-bellied Sea Eagle!

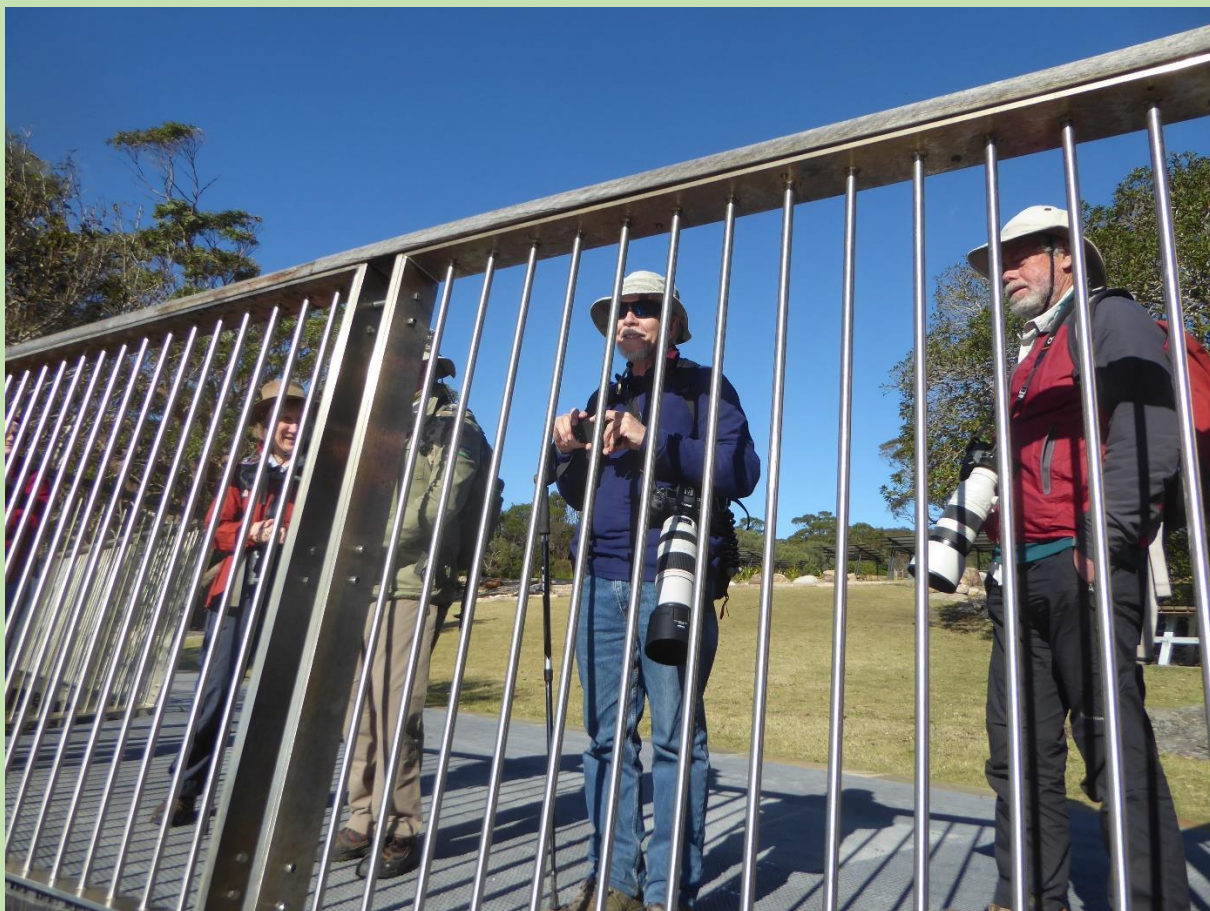

No, not clipped!

But let us begin at 10.00am when we all gathered, checked out the site at Wattamolla and the changes that had been made since many had arrived!

And the power of flood waters

Safely behind bars

Chloanthes stoechadis

Senecio laetus subsp. maritimus – Coast Groundsel

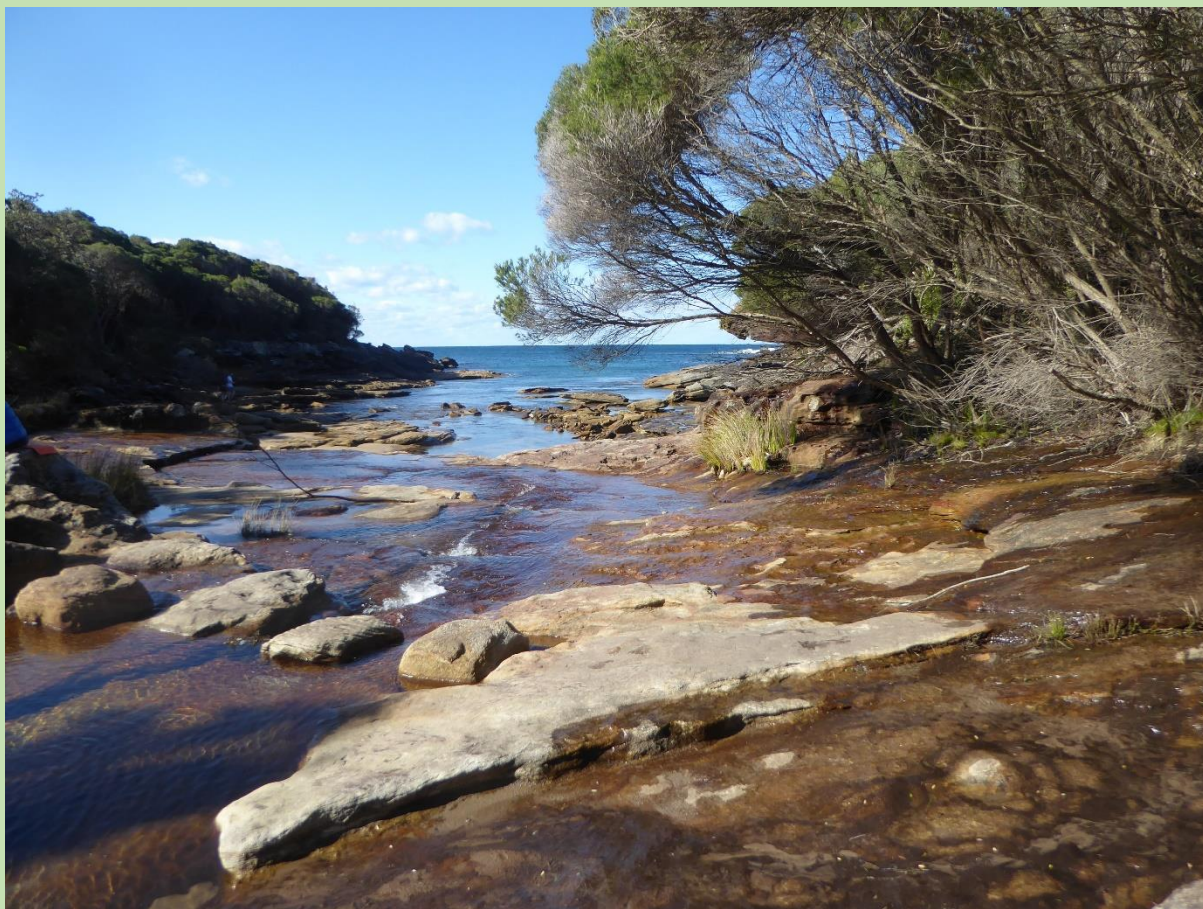

Synoum glandulosum - Bastard Rosewood or Scentless Rosewood

Spores of the Rock Felt Fern, *Pyrrhosia rupestris*

And with that text-limited report, it's time to say thanks for coming out again to enjoy this part of our world!
