Curra Moors

It was a hot and humid day but Faye and I did walk along the Curra Moors Fire Trail to the junction, noted that the other branches of that fire trail were also now complete and opted to finish our walk by walking back up via the Curra Moors track and along the road to the car (well, me to the Walumarra Track and Faye sent the last bit ahead to collect my car!) We had completed the 7km loop before midday (starting at 8.10am)

Drainage lines

Haemodorum planifolium

Angophora hispida

Anthocyanin in the new eucalyptus leaves
Anthocyanins may have a protective role in plants against extreme temperatures (their
sunscreen!!!!)

The natural peat used as an embankment to control water flow

The sign indicates distance to the next passing lane: RMS must approve fire trails as appropriate to the CAT standard!

Common Grass Blue butterflies were everywhere today

Lomatia silaifolia or Crinkle Bush

Considerable new trackwork laid

But already wash out under the steps!

Cryptostylis subulata – Large Tongue Orchid
